Gemini Hackathon | Google DeepMind

[Descend](#)

- [Overview](#)
- [My projects](#)
- [Participants \(16603\)](#)
- [Resources](#)
- [Rules](#)
- [Project gallery](#)
- [Updates](#)
- [Discussions](#)

Resources:

The free tier is only available in [AI Studio](#). To get started, access the [Build tab of AI Studio](#) to easily and quickly build advanced applications. You can also find existing templates to get started in our [Gallery](#).

Docs

- [Gemini API Docs](#)
- [Get Started with Antigravity](#)

Videos

- [Gemini 3](#)
- [Vibe Coding in AI Studio](#)

Inspiration:

Need a spark? Start here. Gemini 3 isn't just a chatbot—it's a multimodal reasoning engine. It can see, hear, and understand the world in real-time. Don't just build a text interface; build something that senses and reacts.

The launch of Gemini 3 signals the start of the Action Era, transitioning from static chat to autonomous agents that plan and execute complex, long-running tasks. This global hackathon, hosted by Google DeepMind and Devpost challenges you to build high-fidelity AI-powered applications using the Gemini API.

We strongly discourage the following types of projects:

In the Action Era, if a single prompt can solve it, it is not an application. We are looking for orchestrators building robust systems using the Gemini API in Google AI Studio.

- Baseline RAG: Gemini 3 Pro features a verified 1M token context window. It natively reasons over entire codebases and document sets; simple data retrieval is now a baseline feature.
- Prompt Only Wrappers: Applications that are merely system prompts in a basic UI.
- Simple Vision Analyzers: Basic object identification is obsolete. We want to see spatial-temporal video understanding that recognizes cause and effect.
- Generic Chatbots: Standard bots for nutrition, job screening, or personality analysis.
- Medical Advice: No projects generating medical or mental health diagnostic advice.

Strategic Tracks:

These tracks focus on market potential and technical depth. We encourage you to innovate beyond these prompts to showcase the full potential of Gemini 3 Pro.

💡 **The Marathon Agent:** Build autonomous systems for tasks spanning hours or days. Use Thought Signatures and Thinking Levels to maintain continuity and self-correct across multi-step tool calls without human supervision.

- 🎯 **Vibe Engineering:** Leverage the Google AI Studio Build tab and Google Antigravity. Build agents that do not just write code but verify it through autonomous testing loops and browser-based verification artifacts.
- 🎤 **The Real-Time Teacher:** Use the Gemini Live API to synthesize live video and audio for adaptive learning.
- 🎨 **Creative Autopilot:** Combine Gemini 3 reasoning with Nano Banana Pro for high-precision multimodal creation. Use higher resolution and localized Paint-to-Edit controls to generate professional, brand-consistent assets with legible text

FAQs

1. How does Access to the free tier of Gemini 3 work?
 - Here is how the [Gemini API pricing](#) (free tier with quota limits in AI Studio) works
